

Artificial Intelligence & Big Data Specialization

Job openings for data scientists rose by 75% from January 2015 to January 2018, according to Indeed.com. Today, Data Scientist is the number one job in the US across every industry based on job openings, salary and overall job satisfaction (Glassdoor's 50 Best Jobs in America report). The demand for data scientists is increasing so quickly, that McKinsey predicts that in the near future, there will be a 50% gap in the supply of data scientists versus demand.

Entire industries have been and will continue to be disrupted by AI. Our Artificial Intelligence and Big Data Specialization will enable you to gain the skills, experience and certification you need to be successful in the new AI economy. You will learn the best AI practices and methodologies and be mentored by some of the best experts in the field.

The Innosoft AI and Big Data Specialization
